

# THE TOUCH TABLE WITH A DIFFERENCE.

There's no touch table quite like ours. The T Series comes with fully height adjustable legs, PCAP touch technology, and dual Windows and Android OS.

## Where is it used?

Our T series Touch Table has been used globally, in a variety of different ways, in a multitude of different companies, commercial spaces, information points and educational institutes. Here's just some of the ways it's being utilised:

### Hospitality

From hotel lobbies to restaurants, clubs and bars. Our touch table has been successfully integrated into businesses large and small the world over.

### Education

From primary to higher education, the touch table is perfect for making lessons more engaging and interactive.

### Commercial Spaces

Whether you're looking for a new way to advertise your products or you just want to provide your customers with information, the T Series helps you do it all.

### Banks & Building Societies

Our T Series is used as an information point and client Q&A terminal in banks and building societies around the world.

T SERIES | 55"

## AT A GLANCE

### PCAP Sensor Technology

Our T Series has a matrix of sensors built into the screen that enables up to 50 simultaneous touch points. When the task is intricate, the T Series lets you be as precise as you want to be.

### Dual OS Support (Windows & Android)

In a business, commercial or educational environment adaptability is key. With our T Series you can switch between Windows (EZ OPS) and Android (Internal) at the touch of a screen.

### Direct Bonding

Our PCAP T Series is direct bonded. This means that the screen and panel are chemically bonded together leaving no airgap. This improves screen strength and dramatically reduces screen glare and fogging.

### Adjustable Height

Some of the greatest inventions are sometimes some of the simplest. Our T Series does a very simple thing a lot of other touch tables don't. It is completely height adjustable. Pre-set 3 different heights or you can just simply adjust the height manually to suit your needs.

### Live 4PIP Screen

This nifty feature gives you the ability to display multiple media from four different devices, on the same screen, at the same time. Choose whatever source you need and switch whenever you want.

## EZ Accessories

### EZ OPS

Our EZ OPS is our powerful portable PC module built in conjunction with Intel. Simply slide the EZ OPS into the side of the T Series.

Once installed the EZ OPS and T Series act as one unit. Power, temperature control, network connectivity and connections are all synced.

## Simple Specs

Touch & Panel	Touch Technology	PCAP
	Simultaneous Touch Points	50
	Touch Accuracy	1mm (Max)
Android	Response Time	6ms
	Optimum Resolution	Ultra HD 3840x2160@60Hz
	Response Time	8ms (Typical)
Connectivity	Chipset	RK3288
	Core	Cortex A17 Quad Core
	GPU	Mali T764
	OS Version	KitKat 4.4.2
